ppm+ Release Contents PPM+ 20.3:

Date Expected Live: 01/04/2020

Contents: This is a major release for PPM+ across a number of areas:

Included in the 20.3 release of PPM+ are the following:

EHR-4320 Supporting a Bed Rails Risk Assessment and Summary View

Bed rails risk assessment e-form and summary to be released ahead of the main body of the Falls CQUIN work as it is the only element that does not need to be piloted.

Agreed approach:

- Bed Rails e-form will be made available from Add Clinical Document

- Submission of e-form will not put a separate pdf in the event list

- Submission of e-form will put an entry into a 'Bed Rails Risk Assessment' Summary view*

- Because the current falls forms are not being replaced at this stage, the 'Falls Summary' which the Falls Daily Care Plan feeds into will still be present in the event list in addition to the new 'Bed Rails Risk Assessment' Summary

- Bed Rails task will not be switched on

*We will temporarily rename the new 'Falls and Bed Rails Risk Assessment' to 'Bed Rails Risk Assessment' and hide the new falls rows so that there is no confusion between the existing falls summary and the new bed rails summary (that will both be visible in the event list). When we switch the whole falls process inc. tasks and forms on, we will rename the aggregation appropriately and unhide the falls rows we need.

EHR-2685 Improving support to creating automated clinical tasks from Suspicious Radiology Findings

Work to extend automated tasks created from Radiology reports with #

      Including the related radiology report into the resulting task
      Creating task filters that support #Unexpected and #Suspicious
TOGGLE OFF UNTIL FURTHER NOTICE

EHR-2538   Work to display the Mental Health Dashboard view on the mobile device and persist LYPFT alerts

Scope to include the following:

Allowing the Mental Health Dashboard to be view-able on the mobile app
Introducing the wider concept of dashboards being available on the mobile app so that future dashboards are seamlessly added

EHR-2434   Integrating the emerging Trust document management system (Alfresco) within PPM+ to support scanning strategy and improving the performance of the event list within PPM+ (Phase 1)

Alfresco

Link to test account (Jonny, Sam and Aparna should have login deatils (same as network))

http://alfvmappd01its.trust.leedsth.nhs.uk:8080/share/page/

• POC-2: Scanning with OCR for storing and searching. Using Chemocare charts as a test, these will be forward scanned using the ECM 'out of the box' OCR tool to automatically detect the document type and key information from the document

• POC-3: PPM+ Integration. Using the above POC, the scanned charts will be automatically integrated and viewable on the patient's event timeline within PPM+/LCR.

The POC from a PPM view will be to establish that PPM+ can launch a document held in Alfresco using the Alfresco document viewer

It is anticipated that this will be the feature that drives out delivery of an improvement in the optimisation and functionality of the SPV Event List.

Improving the performance

Create an initial RLS for the EHR that aligns to the strategic event store approach to delivering a single query-able resource of activity and resources available to the system.

It should form the basis of replacing the complex views and queries that currently compile the SPV event list

It should allow for future easy decommissioning of PPMv1

Initial work is intended to run alongside Alfresco work

The RLS will eventually hold every patient level eForm/feed that is processed via the event

store and provide a hook into the LHCRE call for data being the initial source of information regarding available events that can then be used by the LHCRE System of Systems to call for an individual document

EHR-2373 Downgrading Clinical Trial Alerts so that they do not appear as Critical Priority

Various issues with the scope of the display of clinical trial related records in the single patient view are grouped under this epic.

EHR-1710 *Patient Wellness Questionnaire

Delivery of a Patient Wellness Questionnaire for completion by the patient and possible incorporation within eObs eventually

1k relying upon delivery
TOGGLED OFF UNTIL FURTHER NOTICE

EHR-957 Allowing empty beds to be displayed on the mobile display

We now have the ability to view a ward by bed rather than patient. It has been suggested that we should enable the option to also view empty beds in this view, and to be able to set the state of the bed usig the bed managment functionality

EHR-48 Falls CQUIN work linking NSA, Falls, Bed Rails and L&SBP into a process (phase 1)

Primary focus of this work is to support CQUIN 'Three high impact actions to prevent Hospital Falls' which, for patients over 65 requires:

     Lying and standing blood pressure (L&SBP) to be recorded at least once during the admission
     Mobility assessment documented within 24 hours of admission (walking aid not required / provided within 24 hrs of admission)
     Certain exemptions apply

Additionally, refinement of some existing nursing e-forms is needed which presents the opportunity to link them together into a process to which further assessments can be added over time

04/02/2020 JW - Agreed that NSA task, NSA e-form, initial 'Falls and Bed Rails Risk Assessment' task and Lying and Standing Blood Pressure related stories will be excluded from the 1st phase of development as we want to use dashboard to display NSA results and are short on time to deliver the other requirements mentioned. Affected stories moved to EHR-836.
TOGGLED OFF UNTIL FURTHER NOTICE

EHR-585   20.3 Small changes that deliver quickwins for users

Each release has the potential to deliver very small but beneficial changes. Rather than create an EPIC for each individual change, this EPIC allows for multiple small RFCs and their associated stories to be managed through a release cycle.

EHR-593	(Should Do) Change Priority level ofd Clinical Trial Alerts
EHR-594	(Should Do) Rename WINDIP Folder name
EHR-601	LIVE ISSUE (Should Do) Twitter account for YHCR
EHR-602	LIVE- Custom List - 'Comments' column eform title still references 'Custom List Details'
EHR-603	Mid Yorks - External Options
EHR-1179	LCR: Update to widget
EHR-2520	Fixes and improvements to EHRReporting/CDS import
EHR-2971	(Should Do) Removal of the LCH GP Communication task
EHR-3204	[LIVE] [Service] results not showing in Cummulative View for multiple tabs
EHR-3266	(Could Do) Handle patient merges in service referrals

EHR-568   20.3 eForms Quickwins

Work to deliver minor eforms and changes within the release

EHR-569	(Must Do) YLST Warning to be presented identifying patients who are not eligible for a scan
EHR-580	Make AHP text boxes larger
EHR-581	LIVE - YLST - Lung Health Check Clinical Information - SF-12 Questionnaire - The text in the question highlighted in the issue description does not match the acceptance criteria
EHR-582	[LIVE] YLST - Lung Screening CT Request Form - 'Eligible for LDCT scan' field validation issue
EHR-584	[LIVE] YLST - Lung Health Check Eligibility Re-check - Issue with skip logic for displaying the warning message "Patient not eligible for CT scan"
EHR-950	(Should Do) Removal of upper age restriction (YLST USPSTF calculator)
EHR-952	Removal of age restriction (YLST age restriction)
EHR-1092	Non-Surgical Oncology Triage Assessment form
EHR-2634	(Must do) FEEDBACK Migrate Patient's Personal Disclaimer eForm
EHR-2684	Uplift Patient's Personal Disclaimer
EHR-2687	Patient's Personal Disclaimer - Time allowed to be in the future
EHR-2688	Patient Personal Disclaimer - Form validation prevent submission
EHR-2689	Patient Personal Disclaimer - PDF rendering error
EHR-2940	Patient Personal Disclaimer - Hover text is missing the initial question
EHR-2941	Patient Personal Disclaimer - Snippet text is missing initial question
EHR-3426	(Must Do) Deactivate pre-assessment medical history task

EHR-4446   Patient Personal Disclaimer - Incorrect validation for 'Time of witness signature' & 'Time' fields

EHR-4447   Patient Personal Disclaimer - RBAC 4 should be able to withdraw

Stories:

EHR-1711   (Must Do) Patient Wellness Assessment

EHR-1722   (Must Do) Tabulated Patient Wellness Score

EHR-950   (Should Do) Removal of upper age restriction (YLST USPSTF calculator)

EHR-569   (Must Do) YLST Warning to be presented identifying patients who are not eligible for a scan

EHR-2634   (Must do) FEEDBACK Migrate Patient's Personal Disclaimer eForm

EHR-3426   (Must Do) Deactivate pre-assessment medical history task

EHR-3266   (Could Do) Handle patient merges in service referrals

EHR-593   (Should Do) Change priority level of Clinical Trial Alerts

EHR-594   (Should Do) Rename WINDIP Folder name

EHR-1179   LCR: Update to widget

EHR-2971   (Should Do) Removal of the LCH GP communication task

EHR-1181   MOBILE - option to see empty beds on ward view

EHR-1182   MOBILE - ability to perform bed management from ward view

EHR-2374   Trial Alerts probably shouldn't be shown for non-treatment studies

EHR-51   Ability to close tasks without completing them and prevent further tasks of the same type from recurring

EHR-105   (Must Do) Falls and Bed Rails Risk Assessment eForm

EHR-100   (Must Do) Bed Rails Risk Assessment task

EHR-101   (Must Do) New Falls Summary View

EHR-103   (Must Do) Critical Care Falls Assessment and Care Plan Task

EHR-104   (Must Do) Falls and Bed Rails Daily Evaluation task

EHR-110	(Won't Do) Retire Falls Column from MPV
EHR-1193	Go-Live - Falls and Bed Rails Daily Evaluation Task replaces Falls Daily Care Plan Task
EHR-1194	Closing tasks without completing eForm
EHR-1192	Radiology report to be displayed in associated radiology form
EHR-2423	(Must Do) Identifying Suspicious and Unexpected Findings (MVP)
EHR-3240	(Must Do) Update hashtag from #LungCa to #ChestRecall
EHR-3241	(Must Do) Radiology task for the MDT co-ordinator
EHR-2464	(Must Do) Behaviour when document is updated in Alfresco
EHR-2493	(Should Do) user can scroll to previous/next alfresco document
EHR-2494	(MUST) View Alfresco documents in EVENT LIST on PPM+ (restricted documents)
EHR-2495	(Should Do) Alfresco UNAVAILABLE - unable to view documents in PPM+
EHR-2496	(Must Do) Behaviour when document is withdrawn/deleted in Alfresco
EHR-2497	(Must Do) Send user details to Alfresco each time a user views a document via PPM+
EHR-2498	(Must Do) SNOMED codes added to a document in Alfresco show in PPM+
EHR-2499	(Must Do) View CONTENT of Alfresco documents in PPM+ (Non restricted documents)
EHR-2502	(Should Do) Alfresco contents of eform
EHR-2505	(MUST) (ALFRESCO) Messages from Alfresco to PPM+ (MVP)
EHR-2508	(MUST) (ALFRESCO) Restful API Episoft to PAS/Symphony
EHR-2974	(MUST) View Alfresco documents in EVENT LIST on PPM+ (non restricted documents)
EHR-98	(Must Do) Bed Rails Risk Assessment eForm
EHR-2539	(Must Do) Display the Mental Health dashboard within the mobile app
EHR-2540	(Must do) Display and store mental health alerts / flags

Bug Fixes:

EHR-1730	Patient Wellness Questionnaire-form appearing in event list with two entries
EHR-582	[LIVE] YLST - Lung Screening CT Request Form - 'Eligible for LDCT scan' field validation issue
EHR-584	[LIVE] YLST - Lung Health Check Eligibility Re-check - Issue with skip logic for displaying the warning message "Patient not eligible for CT scan"
EHR-581	LIVE - YLST - Lung Health Check Clinical Information - SF-12 Questionnaire - The text in the question highlighted in the issue description does not match the acceptance criteria
EHR-2687	Patient's Personal Disclaimer - Time allowed to be in the future
EHR-2688	Patient Personal Disclaimer - Form validation prevent submission
EHR-2689	Patient Personal Disclamer - PDF rendering error
EHR-2940	Patient's Personal Disclaimer - Hover text is missing the initial question
EHR-2941	Patient's Personal Disclaimer - Snippet text is missing initial question
EHR-3204	[LIVE] [Service] results not showing in Cummulative View for multiple tabs
EHR-601	LIVE ISSUE (Should Do) Twitter account for YHCR
EHR-602	LIVE - Custom List - 'Comments' column eform title still references 'Custom List Details'
EHR-603	Mid Yorks - External Options
EHR-2375	[LIVE] Potential Patient Safety Issue with Trials documentation into PPM+
EHR-2376	Trial Alerts "Active Clinical Trial" remain on Record Locator when the trial subject end date has passed
EHR-3037	Record Locator display of old XForms can miss records
EHR-3407	falls tasks not closing on ward transfer
EHR-3414	falls tasks-new task not replacing the current task when new form completed
EHR-2471	New Falls Summary View-missing fields from table

EHR-3427	falls eform-default pathway on opening
EHR-2378	Bed Rails Risk Assessment eForm-missleading label above summary view
EHR-2403	Bed Rails Risk Assessment Summary View-table fields to be removed ie last edited by and date last edited
EHR-2421	New Falls Summary View-extra boxes in summary table
EHR-2458	Falls and Bed Rails Risk Assessment eForm- screening section-label missing when in critical care pathway
EHR-2509	Closing tasks without completing eForm-name change to form
EHR-3419	Falls cquin tasks-no hover text for close of form function
EHR-3420	falls tasks-two new falls tasks appearing
EHR-3458	New Falls Summary View : Snippet & Hover text : Falls and Bed Rails Risk Assessment
EHR-4246	Falls and Bed Rails Risk Assessment e-form - Assessment Decision tab header should not be present when Ref-2 = Yes
EHR-3326	Radiology - task not triggered when report body containing #Significant #Unexpected is flown from CRIS to PPM+ UAT1
EHR-3411	Custom List : Suspicious Findings (Radiology Investigations) - filtering by task - Chest Recall - MDT co-ordinator does not give expected result
EHR-3413	Suspicious Findings (Radiology Investigations) - patient's task includes investigations names (not matching / related to #chestrecall, #significant, #unexpected)
EHR-3109	Alfresco - Shows "Insufficient privileges" when tried to view the documents as LCR user
EHR-3327	Alfresco - Mid Yorks users can not view the document
EHR-2397	Alfresco - Speciality is not mentioned both in Snippet and Hover text
EHR-2512	[LIVE] issues with Windip scanned documents - unable to open listed document
EHR-3029	Alfresco - Merging of documents not happening
EHR-3239	Alfresco - Speciality in Hover text and Snippet text error
EHR-3371	Alfresco - Updating a document in Ephesoft as medical records is not possible

EHR-4247   Alfresco - Restricted documents still appear when a filter is applied in event list

EHR-2501   Alfresco - Source of the document is not mentioned in the Snippet and Hover text

EHR-2966   Alfresco - Event list not updated when a document is updated in Alfresco

EHR-2967   Alfresco - Unable to view the document when updated as a non-restricted document

EHR-3016   Alfresco - Snomed code not updated instead shows FileLink

EHR-3017   Alfresco - Selecting "Unrestricted" in Alfresco makes the document "Restricted" in PPM+

EHR-3021   Alfresco - Document name in PPM+ not matching with Alfresco

EHR-3041   Alfresco - Asking "Alfresco" username and password details when trying to view the Alfresco document in PPM+

EHR-3445   Alfresco - Message not displayed when Alfresco is unavailable

EHR-3448   [LIVE] - Alfresco - The "Event list category" is still showing the number after the documents are deleted/withdrawn

EHR-4094   Alfresco - Fields not displayed when Alfresco is unavailable

EHR-3110   Alfresco - Date of the document in Alfresco not matching with the "Scanned date"

EHR-3416   Mobile - Mental Health Tab - Dates not matching between desktop and mobile

EHR-4244   LYPFT Mobile - Alerts not displaying when call fails

EHR-3404   LYPFT Mobile - Changing orientation of device after zooming in displays a zoomed in view
