GP Supportive Care Plan

Applies to: Pilot Users

A Supportive Care Plan generated from GP systems has been made available to a small group of pilot users this week. In the first instance, the pilot is restricted to a small group of LTHT clinicians working in the geriatric and palliative care wards.

This plan gives advanced care information to care providers to help improve the quality of care provided in Leeds for patients with advanced care needs. The information is presented in a tabbed view as seen below:-
