

ppm+ Release contents v17.2.17 (Ef):

Date Expected Live: Thursday 14 Dec 2017

Contents: V17.2.17 Ef is a minor release to deploy the following:

- make changes to the current Holistic Needs Assessment eform to improve efficiency and effectiveness of use
- a new eForm to capture Tuberous Sclerosis Complex clinical details for patients which could be accessed by other clinicians to allow capture of the clinically relevant information and audit data set electronically and improve communication between clinical teams
- a basic eform to replace the paper Heart Failure proforma capture currently used for patient heart failure key information
- a basic e-form to replace the current Heart Failure Outreach Review with the option if they need the results of the tests to be included in the e-form (to be added by manual entry)

Features:

[CP-12824] - Update Holistic Needs Assessment eform

[CP-13909] - Create Children Tuberous Sclerosis Complex (TSC) Assessment Form

[CP-13464] - Create Heart Failure Proforma

[CP-13261] - Heart Failure Outreach Review
