

## ppm+ Release contents v17.2.22

**Date Expected Live:** Wednesday 20th December 2017

**Contents:** V17.2.22 is a minor release to deliver the following changes to production:

- Make the source of the content in the 'Casenotes' folder visible so that the clinical record being reviewed reviewing is fully understood
- When WINDIP documents are accessed through the API, the date displayed to be hidden from the event list so that it is not incorrectly assumed the date represents the delivery of activity

### Features

- [CP-14655] - Change the 'Casenotes' folder descriptor to recognise content is scanned
- [CP-14657] - Improve the display of the WINDIP sourced document dates

### Bug Fixes:

N/a

### Forms:

N/a

### Other:

N/a

### Implementation Plans:

| Item | Dept | Start Use | No Users |
|------|------|-----------|----------|
| N/a  |      |           |          |
