Important Information

This this is the first iteration of the Bed Flow report and is in the minimum viable product state. Over time we will improve the function of the; your feedback will help shape it in the future. It takes data from Symphony, PAS and PPM+ therefore it is only as good as the information entered on these systems. For help with how to update information on PPM+, please contact lth.scan4safety@nhs.net

Please send feedback on using the report and user guide, including any suggestions for improvements to leedsth-tr.iandeworkrequests@nhs.net

Number of inpatients with 'no Reason to Reside' recorded in their latest criteria to reside form
Source: PPM+

The screenshot shows the NHS Bed Flow Summary dashboard for The Leeds Teaching Hospitals NHS Trust. The interface includes a top navigation bar with icons for Bed Requests, Bed Availability, and Inpatient Services. A search bar at the top right allows filtering by Site Name (All) and Clinical Service Unit (All). The main dashboard displays a summary of bed availability and occupancy, with a table showing 16 Open Bed Requests, 83% Available Occupancy, 332 Available Beds, and 36 Unavailable Beds. The source for this data is identified as PPM+.

Annotations highlight specific data points and their sources:

- Number of Open beds in wards described as "Assessment", "Intensive/Critical Care" or "Elective"**: This is linked to the 332 Available Beds figure.
- Number of Open beds in wards not described as "Assessment", "Intensive/Critical Care" or "Elective"**: This is linked to the 16 Open Bed Requests figure.

The dashboard also features a 'Bed Availability' section with four categories of available beds:

Category	Available Beds
Assessment Unit Beds Available	50
Specialty Ward Beds Available	312
Critical Care Beds Available	32
Elective Ward Beds Available	12

Other key metrics include:

- Emergency Department**: Current Attenders = 100, Awaiting Beds = 16.
- Delayed Discharge**: Medicines = 4, Awaiting Transport = 0, Repatriation = 14.
- Inpatients with no Reason to Reside**: 284.

Navigation buttons at the bottom include 'A&E Detail', 'Bed Requests', 'Ward View', and 'Patient View'. The last data refresh is noted as 29/06/2023 12:01.

Live Bed State Definition	Description
Adult Critical Care	Wards managed by the Adult Critical Care CSU which are level 2 or level 3 beds.
Currently closed	Wards which are currently closed due to admission, but may appear on some reports.
Day case ward	Wards which are only used to treat elective day case patients and plan to close overnight.
Discharge	Ward codes which are being used as Discharge pods or discharge lounges, this includes ward areas which are used for stepping patients down, e.g. J16P, JDL.
HOBS/HDU	Ward areas which are specifically designated for High observation or HDU patients. Please note, if a bay within a ward is designated for HDU patients, this will appear on the main ward code.
Maternity / Neonatal	Clinical areas which only treat patients on a maternity pathways or Neonatal units. This capacity would not be
Monday to Friday – Day case	Day case units which routinely close over a weekend. Please note, these areas may open in times of increased pressure or increased elective demand.
Not currently used – to be removed	Do not use
Operating Theatre	Ward codes which are used for procedures.
Overnight bed capacity	This is the main category of general and specialist beds which care for patients 24/7. This includes both elective and non-elective wards.
Paediatric Critical Care	Critical Care units within the Childrens hospital.
SDEC/Assessment Unit	All SDEC and Assessment units. Most patients are ambulatory but there may be admissions to some units. This does not include ‘admission wards’ such as MAU, these are within the Overnight bed capacity

Quick Start guides

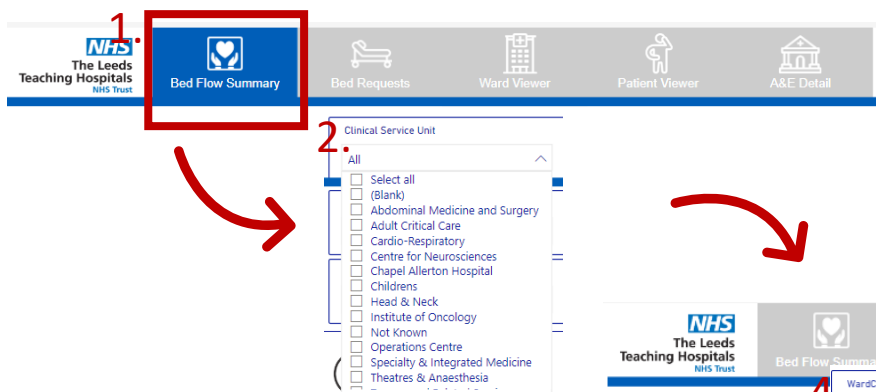

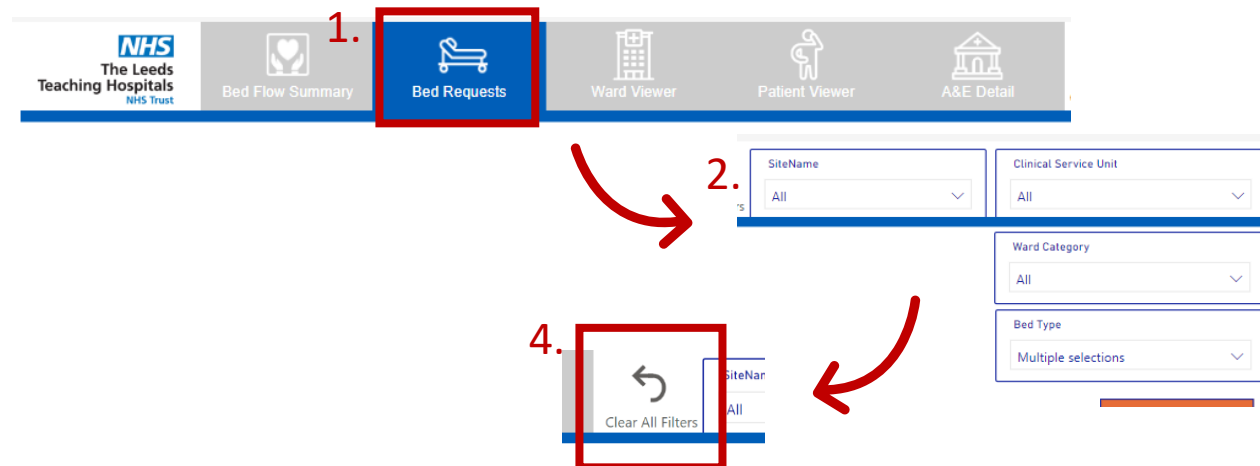

- [Clinician](#)
- [Clinical Site Manager](#)
- [Clinical Site/Corporate Ops Manager](#)

Clinician Quick Start Guide

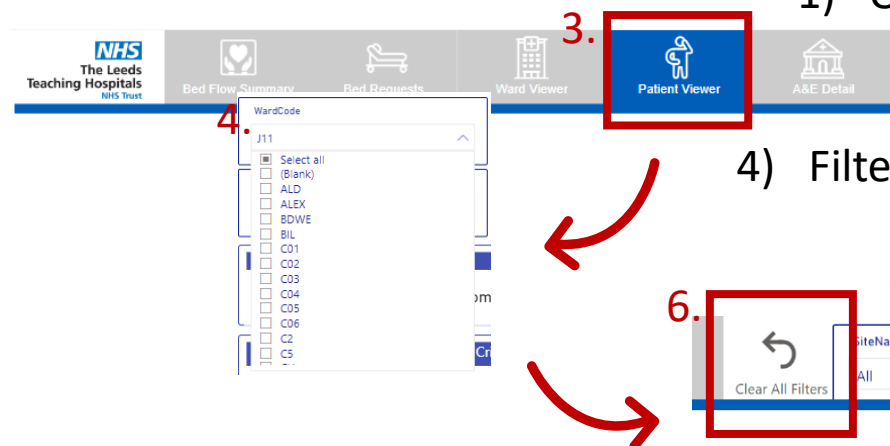

Where are there free beds in the hospital?

- 1) Open the report, click on the Bed Requests tile
- 2) Filter the report by site, CSU, Ward Category or Bed Type
- 3) Scroll in the tables to see available bed detail
- 4) Click the "Clear all Filters" button when finished

How many patients on my ward do not have a reason to reside?

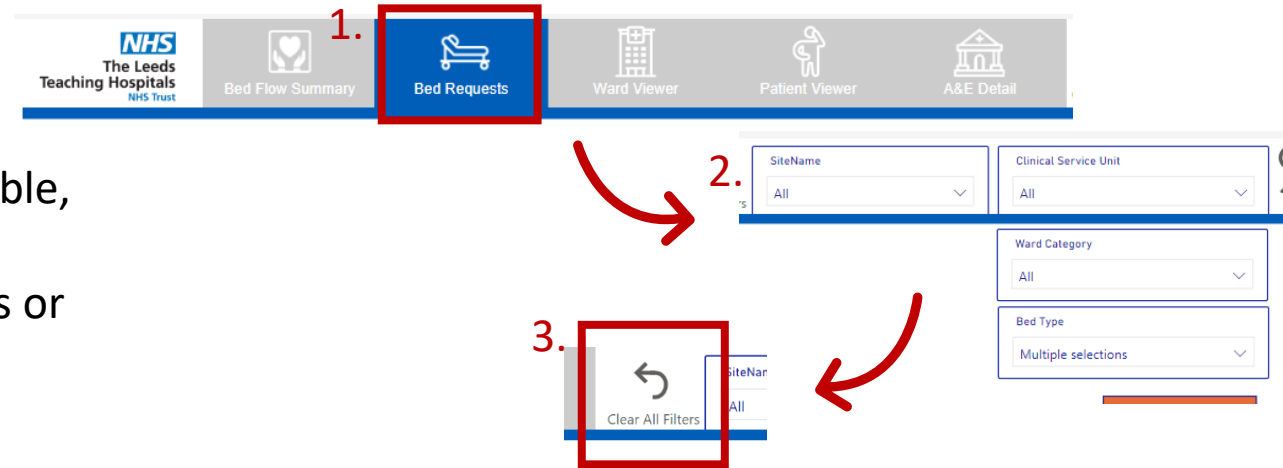

- 1) Open the report, click on the Bed Flow Summary tile
- 2) Filter the report to your CSU
- 3) Now click on the Patient Viewer tile
- 4) Filter the report to your ward using the WardCode filter
- 5) Scroll in the table to see R2R detail
- 6) Click the "Clear all Filters" button when finished

CSM Quick Start Guide

What's the bed utilisation and throughput per ward?

- 1) Open the report, click on the Bed Requests tile
- 2) Scroll in the tables to see bed occupancy, requests, available, occupied, and closed beds and patients for potential transfer/discharge for all sites, CSUs, wards and bed types or filter to specific areas
- 3) Click the "Clear all Filters" button when finished

Who do we have in a bed, who needs a bed and who needs to go home for each ward/specialty?

As above, or for patient detail:

- 1) Click on the Bed Flow Summary tile
- 2) Filter the report to a CSU
- 3) Now click on the Patient Viewer tile
- 4) Filter the report to ward or specialty using the WardCode and Ward Specialty filters
- 5) Scroll in the table to see patient detail
- 6) Click the "Clear all Filters" button when finished

CSM/Corporate Ops Manager Guide

Which patients are ready for discharge?

- 1) Open the report, click on the Bed Flow Summary tile
- 2) Filter the report to a CSU
- 3) Now click on the Patient Viewer tile
- 4) Scroll in the table to see patient detail, including R2R, EDD, MOFD, CLD and EDID status
- 5) Click the "Clear all Filters" button when finished

Which patients have no reason to reside, no EDD or an MOFD date which has passed?

As Above

1. Bed Flow Summary

2. Clinical Service Unit

3. Patient Viewer

4. J11

5. Clear All Filters

R2R:

- = Has a reason to reside (hover cursor over tick for reason)
- = Does not have a reason to reside

EDD:

- = Has estimated discharge date in the past
- = Has estimated discharge date <7 days from now
- = Has estimated discharge date >7 days from now

MOFD:

- = Recorded as MOFD
- Otherwise blank

CLD:

- = Is on CLD pathway, but not all criteria complete (hover cursor for number criteria incomplete)
- Otherwise blank

EDID:

- = Has an EDID record and status is **not** 'Sent' or 'WD'
- Otherwise blank

Troubleshooting Common Issues

“The numbers the report is displaying don’t seem right”

First, try pressing the ‘Clear all Filters’ button at the top of the report. This resets the report to default.

Then, reset your desired filters from the Summary tile. The report works best when the filters are set from there.

Next, update PPM+ to ensure the report has the most accurate data. For help with this, contact lth.scan4safety@nhs.net. We are also working on improving the report’s accuracy and efficiency behind the scenes.

Finally, email leedsth-tr.iandiworkrequests@nhs.net to log the issue.

“I’m getting an error message which says ‘Visual has exceeded the available resources’”

Try filtering to fewer CSUs or ward specialties. The patient table works best when just one CSU is selected.

“The tiles are taking a long time to load”

This is a known issue, particularly with the Patient Viewer tile. DIT are working on improvements.
