

# CRITERIA LED DISCHARGE

When can I go home?

We'll agree some criteria that must be met before you can go home.

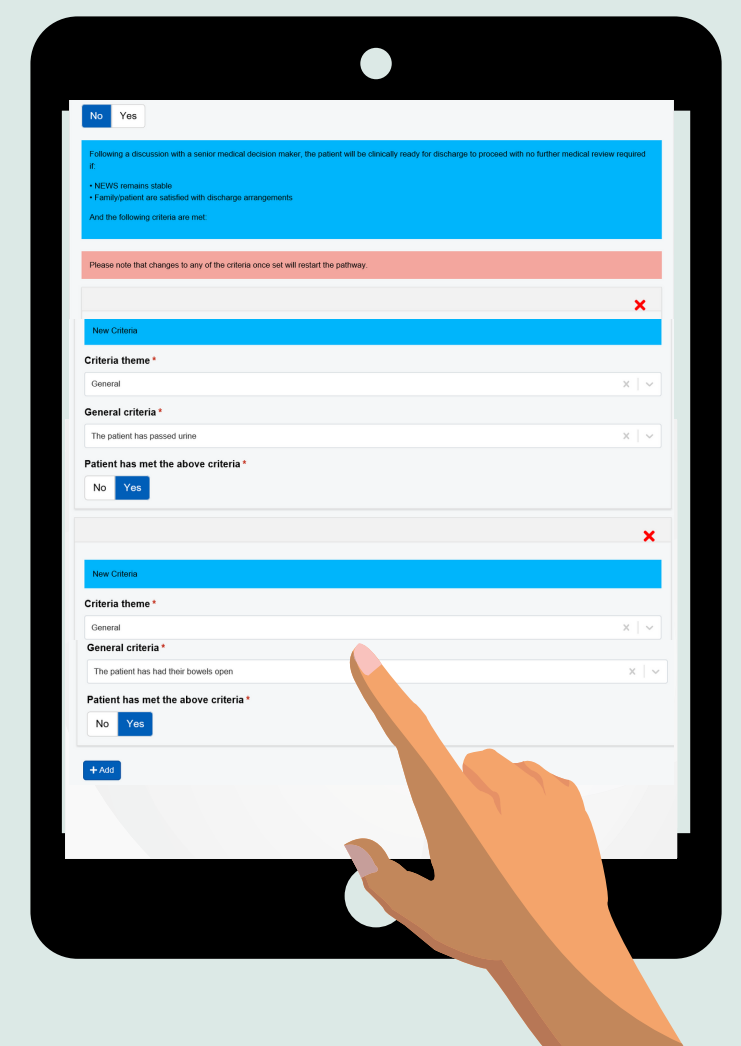

**Criteria Led Discharge (CLD) is a process where the parameters for a patient's discharge are clearly defined.**

**The eForm is used to record the criteria set by a senior clinical decision maker (usually a Consultant, Registrar or SAS Doctor) and can be completed on their behalf by a Registered Health Professional. Also, once submitted, the eForm can be edited by any Registered Health Professional.**

**The eDAN should be written and authorised at the same time as the criteria are set.**

**The eForm can be viewed and edited via the desktop version of PPM+ and via the PPM+ mobile app on the Trust iPads.**

**Scan here to go to the PPM+ helpsite for further information.**
