

There are now three MRI Inpatient eforms available in PPM+ which can be added via 'Add Clinical Document' in the patient record.

The MRI Inpatient Screening
Checklist should be completed for all inpatients requiring an MRI scan.
This checklist must be completed with the patient.

The MRI Confirmation of Interventions

During Inpatient Admission eform.

MRI will let you know if this is required and it must be completed by a Doctor or Registered Nurse.

The MRI Patients at Risk of

Deterioration Risk Assessment should
be completed by a Doctor where a
patient identified to be at moderate to
high risk of clinical deterioration has
been referred for an MRI scan.
