In mid April 2021, the 'Discharge/Transfer Planning' form will be changing to the 'Patient Pathway Planning' form. When it is released there will be some noticeable changes to the discharge related columns.

1

EDD & PLANNING columns will remain unchanged.

2

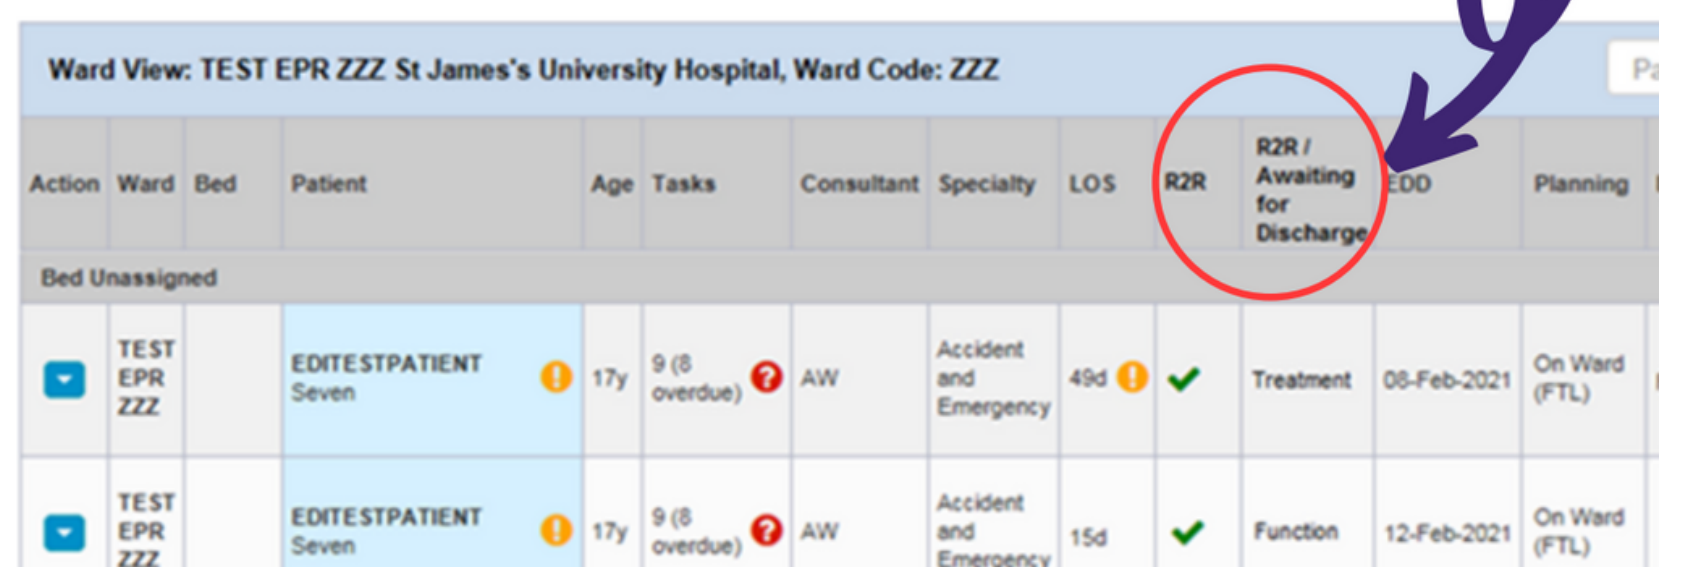

The MOFD column has been replaced by R2R. On go-live the column will be blank. Once the new 'Patient Pathway Planning' form has been completed, a green tick is shown, if the patient meets the R2R criteria. An amber exclamation mark advises that the patient does not meet R2R criteria.

3

The 'Needed for discharge' column has been replaced by 'R2R / Awaiting for discharge'. This column has a dual purpose. If the patient has a reason to reside, it will show that reason e.g. 'Physiology' or 'Treatment'. If the patient does not have a reason to reside, the column will show what the patient is waiting for before they can be discharged e.g. 'Awaiting Transport' or 'Pathway 1 awaiting availability of resource for assessment and start of care at home'.

Every patient will be reviewed against nationally set criteria to determine if they have a 'reason to reside' in hospital. This falls under four predetermined categories - Physiology, Treatment, Function and Recovery.

If the patient does not have a reason to reside 'what the patient is waiting for' is also recorded. The question to ask for every patient is 'Does this patient need to be in Hospital?'

It is important to note that the questions within the form now relate to the patient's R2R rather than asking whether the patient is MOFD
