PPM+ v3.2.11 Release Notes - 4th of June 2015

PPM+ is our flagship project and platform, which is delivering the Electronic Patient Record (EPR) for Leeds Teaching Hospitals staff and the Leeds Care Record (LCR) for GP Practices and Mental Health colleagues. In the last month we have introduced the Unplanned Patient List (UPL) for Live Pilot, SmartCard login for ease of access and integrated the PACS Viewer. For more information and a full list of the version 3.2.11 upgrades, please see below.

[eDAN \(integrated with eMedicines System\) – available to a limited number of users for testing against test patients](#)

Unplanned Patient List (UPL) - management of acute patients coming in to the hospital

Applies to: Leeds Teaching Hospitals users

The Trust will be starting to use an electronic patient list for the management of acute patients (non-elective) coming into the hospital. A live pilot of this patient list will commence in cardiology in early June. It is anticipated that each PPM+ upgrade (pending the outcome of the pilot) will continue to deliver new features supporting acute patient demand.

The Unplanned Patient List (UPL) can be accessed via Browse Lists in the Actions bar on the home tab:

SmartCard Login

Applies to: Leeds Teaching Hospitals and Leeds Care Record users

We have now introduced NHS SmartCard Login as part of this PPM+ release. This will appear as a new option in the login screen alongside the *Login* and *Terms and Conditions* boxes in the top-left.

PACS Viewer (Radiology Images)

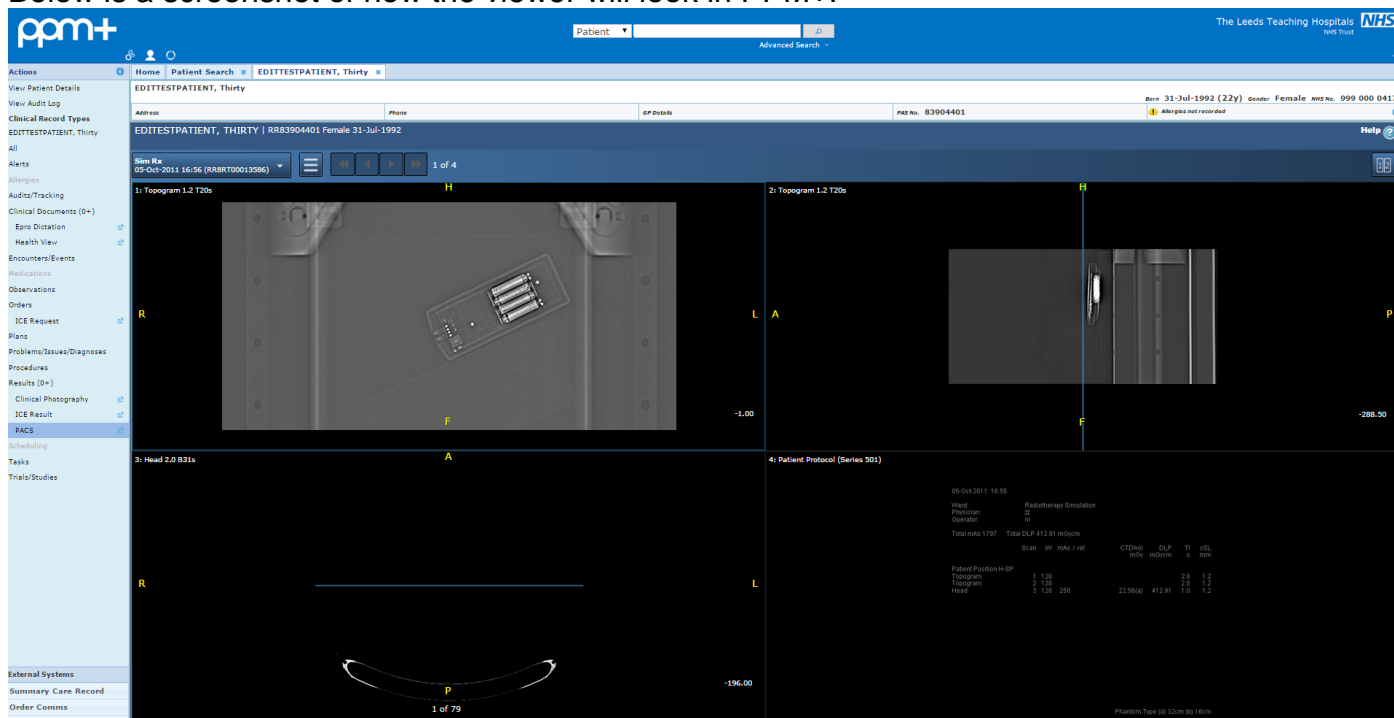

Applies to: Leeds Teaching Hospitals users

The PACS Viewer in the Single Patient View will be enabled initially to a limited set of clinical staff. Further communications will be sent out when available to all users.

Access the PACS Viewer under the Results section of a Patient's Record and the selected patient will automatically be displayed without you having to search again.

Below is a screenshot of how the viewer will look in PPM+:

Fix for correct printing of inpatient lists (more than 40 patients)

Applies to: Leeds Teaching Hospitals users

A previous issue where inpatient lists of over 40 patients were incorrectly printing has now been resolved.

To print a Ward Patient List, click on the print button in the top-right corner of the Ward View:

eDAN (integrated with eMedicines System) – available to a limited number of users for testing against test patients

Applies to: Leeds Teaching Hospitals

Later in the year the eMedicines project will be piloted on J91 and then rolled out across the whole Trust to commence electronic prescribing within the hospitals. To coincide with this, we will also be rolling out eDANs in PPM+ and eventually moving away from the Bluespier system.

During June eDANs within PPM+ will be available to a limited number of users for testing against test patients in a non-live environment. If you would like to have the access granted, please contact the project team with your network username at leedsth-tr.EPR@nhs.net
