17

Brain Attack Contact Form

Comments *

Test

Has the patient been discussed with senior stroke decision maker? *

No Yes

Outcome *

Admission to Stroke Ward

Declined

Other

TIA

These updates aim to make the form more intuitive, more clinically relevant, and more aligned with the BAT workflow

What's changing?

The uplift will enhance fields such as:

- Source of referral
- Presenting complaints
- Initial outcomes and actions taken

Why are we updating the form?

- To capture more meaningful information earlier in the stroke care pathway
- To refine and streamline the questions that will later appear in the BAT Specialty Assessment
- To ensure the form better reflects real clinical needs and supports improved decision-making
