

Clinical Notes Update: New Profession Group filters

What's Changed?

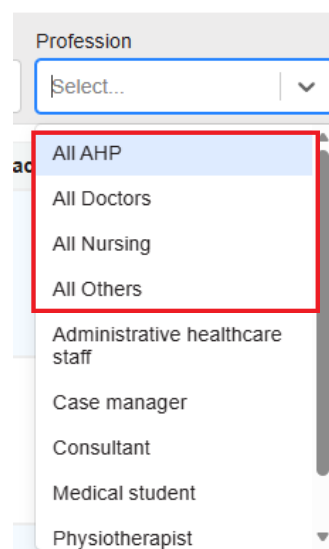

We've improved the filtering options within the Clinical Notes Dashboard to make it easier to locate Clinical Notes from specific professional groups. These changes were approved following user feedback and Digital Steering Group review.

New Profession Group Filters

You can now filter clinical notes by:

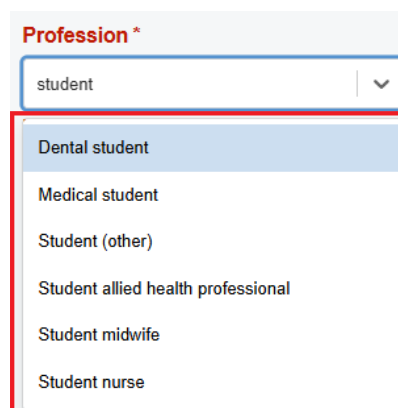

-  All Doctors
-  All Nursing
-  All AHP
-  All Others

Rather than selecting multiple individual Professions under that group, a single selection will return all Clinical Notes from all Professions within that group within the Clinical Notes Dashboard.

Expanded Profession List:

The Clinical Notes profession list is being updated to better reflect the range of staff recording Clinical Notes, including additional professional roles and student options.

Scan this QR code for the User Guide for Clinical Notes, which includes more information regarding these updates.
