

Clinical Note updates in ppm+

What's Changed?

Improved Clinical Notes functionality to support image/body map annotation, better overall organisation and visibility of Clinical Notes.

New Types of note options:

- Nursing
- Consultation
- Clinical Summary

Type of note *

Nursing x v

Type of note *

Consultation x v

Type of note *

Clinical summary x v

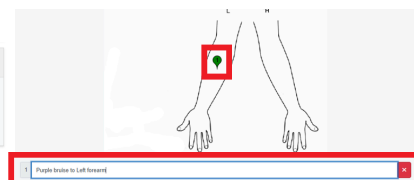

Image/body map annotation:

- Add annotations directly onto an image/body map within a Clinical Note.
- Additional body area maps available.
- The Annotation functionality must not be used to record assessments and care (e.g VIP scores for cannulas and pressure ulcers). Please use existing clinical documentation for this.

Annotate Image

Select the body map you want to annotate

Arms Breast Eyes Face Full body Genitalia (Female) Genitalia (Male) Hands Feet (Soles)

In the Clinical Note Dashboard, you can filter to show:

- Clinical Notes with attachments (images, annotations or both).

Has Attachment?
