

Clinical Summary (Formerly Patient History) ppm+ Dashboard

What's Changed?

- Patient History tab is changing to Clinical Summary (clearer naming) in PPM+.
- Combines PPM1 and PPM+ Clinical Summary entries into one Dashboard view.
- Remove old advisory banner to reduce confusion.
- Clinical Summary entries now appear in a single, consistent list view.
- Scrollable list for easy navigation.
- The 'H' button in PPM1 will have NO change in it's behaviour.

What you can do (PPM+ entered Clinical Summary entries only) depending on access permissions in PPM+:

-  View full Clinical Summary entries (This includes PPM1 entered Clinical Summaries)
-  Create new Clinical Summary entries (+Add button).
-  Edit Clinical Summary entries.
-  Withdraw Clinical Summary entries.

How Clinical Summary entries data syncs between PPM1 and PPM+:

-  PPM1 entries automatically appear in PPM+ in the Clinical Summary Dashboard.
-  Updates to PPM1 entries are reflected in real time in PPM+ in the Dashboard.
-  PPM1 entries are view only in PPM+.
-  Edits/withdrawals for PPM1 entries must be done in PPM1.
-  PPM+ entries do NOT sync back to PPM1, therefore do not appear in PPM1.
