

Criteria Led Discharge Assessment now available in ppm+

Criteria Led Discharge (CLD) is a process where the parameters for a patient's discharge are clearly defined. The eForm is used to record the criteria set by a **senior clinical decision maker** (usually a Consultant, Registrar or SAS Doctor) and can be completed on their behalf by a **Registered Health Professional**. **Criteria Led Discharge Assessment eForm** can be completed via the **PPM+ Mobile App** and the **Desktop version of PPM+**.

After submission of the eform, it can be **edited by any Registered Health Professional**.

Time Criteria Led Discharge agreed *
03:17 PM

Do you want to withdraw this patient from the pathway? *

☐ No ☐ Yes

Following a discussion with a senior medical decision maker, the patient will be clinically ready for discharge to proceed with no further medical review required if:

- NEWS remains stable
- Family/patient are satisfied with discharge arrangements

And the following criteria are met:

Please note that changes to any of the criteria once set will restart the pathway.

The **eDAN** should be **written and authorised** at the **same time** as the criteria are set as also mentioned in the eform .

The eDAN must be completed after this form has been submitted.
