

You can now view Tasks in the Single Patient View on ppm+

Tasks can now be viewed and actioned from the Single Patient View in PPM+

The **View Patient Tasks** in **Single Patient View** function is available in the **Actions Column**.

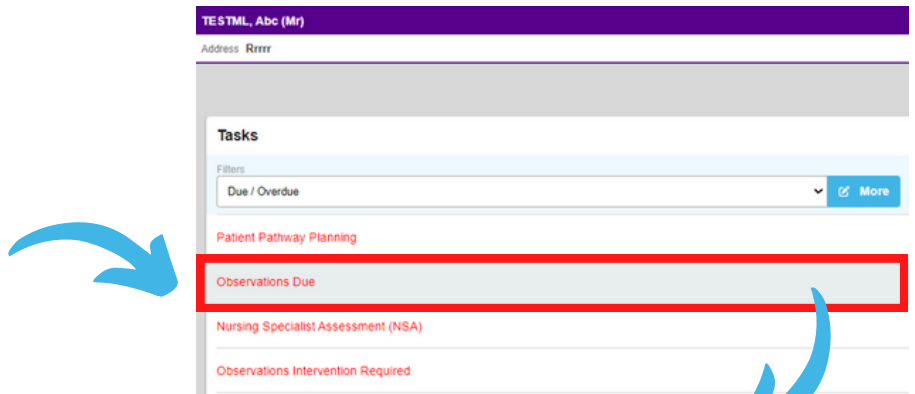

The list will default to show **Due/Overdue Tasks**.

By **Selecting More**, You can filter **Due and Upcoming tasks**, with the additional option to organise by priority by **Selecting Most Due** and **Least Due**.

Selecting the required Task from the List will open the task e-form. Once you have **Completed** and **Submitted** the form the Task will close and the **Task List** will be updated.

You can still view and complete tasks via the **Task Column** on the **Ward View**.
