

Ward Round Dashboard is now available on ppm+

The **Ward Round Dashboard** can be accessed via the **PPM+ Mobile app** and the **Desktop version of PPM+**.

The **Ward Round Dashboard** has been created to **support staff** with **Ward Round management**.

At present, there are **7 widgets** within the **Dashboard**: **Admissions**, **Diagnoses Relevant to current episode of care**, **Problems & Diagnoses**, **Allergies - From Medcharts/eMeds**, **Clinical Notes**, **Tasks** and **Medication On/At Discharge**.

In the future, **additional widgets** will be added to support **Ward Round management**.

The screenshot displays the Ward Round Dashboard interface with the following sections:

- Ward Round / Timeline** tabs and a **Refresh** button.
- Admissions**: Shows patient admission details (26-Feb-2024 to Present, Length of Stay: 10 months, TEST EPR ZZZ, St James's University Hospital, Abbas A, 26/02/2024, The Leeds Teaching Hospitals NHS Trust).
- Diagnoses Relevant to current episode of care**: Lists active diagnoses (Provisional, Asthma: Active) with options to mark as relevant or irrelevant.
- Problems & Diagnoses**: Includes filters, sort options, and a list of active problems (Provisional, Asthma: Active; Provisional, Diabetes mellitus: Active; Provisional, Closed fracture of femur: Active) with 'Mark as Relevant' buttons.
- Allergies - From Medchart/eMeds**: Lists allergies (nuts, LIDOCAINE) with status (Active - Confirmed).
- Clinical Notes**: Shows notes with details like Type, Subject, and Images Attached.
- Tasks**: Lists tasks with filters and sort options.
- Medications on/at discharge**: Displays a message: "The patient has no medication on/at discharge".

Scan this **QR code** to view the **User Guide** for the **Ward Round Dashboard** to learn more.
